# **ATEQ Aviation and Pilot John International Announce Global Distribution Partnership**

## **Strategic Alliance Expands Access to Premium Aviation Testing Solutions Worldwide**

FOR IMMEDIATE RELEASE

September 2025 – Paris, France & Greenville, NC, USA

ATEQ Aviation, the global leader in aviation testing equipment, is pleased to announce a strategic distribution partnership with Pilot John International (Pji), a trusted provider of aircraft maintenance tools and ground support equipment. This alliance is set to enhance the global availability of ATEQ's advanced products through Pilot John's established marketplace, which offers top-tier GSE and tooling, avionics test equipment, aircraft parts, consumables, and pilot supplies.

### **Strengthening the Foundation for Global Growth**

This partnership supports ATEQ Aviation's growth strategy by expanding its reach through specialized distributors in the aeronautical maintenance sector. By reinforcing its international sales network, ATEQ demonstrates its commitment to innovation, adaptability, and delivering exceptional customer satisfaction around the world.

Together, ATEQ Aviation and Pilot John International will provide aviation maintenance professionals—including airlines, OEMs, military organizations, general aviation, and FBOs—access to cutting-edge test solutions wherever they operate. This agreement bolsters ATEQ's existing global sales network, ensuring clients benefit from both technical excellence and responsive support.

### **Expanded Product Availability**

As part of this agreement, Pilot John will now offer a comprehensive range of ATEQ Aviation products, including:

- The full ADSE product line (Air data test sets) with pitot adapter kits
- Battery testers and accessories
- Bond tester and accessories
- Aviation NiCad battery covers

---

This expanded availability enables maintenance professionals to access high-quality, precision testing equipment faster, with the added benefit of Pilot John's industry expertise, customer service, and global logistics capabilities.

### **About the ATEQ Group** <https://www.ateq.com/>

Established in 1975, the ATEQ Group specialises in four core business areas: leak testing, TPMS, aviation, and E-Mobility. As a global leader in leak and flow testing instrumentation, ATEQ is dedicated to delivering high-quality testing solutions that enhance product performance and safety across multiple industries. The group reports annual sales of 187 million euros and employs more than 800 professionals in 40 countries worldwide. With an ongoing commitment to research and development, ATEQ drives innovation and sustained growth.

### **About ATEQ Aviation** <https://www.ateq-aviation.com>

ATEQ Aviation is an international manufacturer of automated testing equipment for aircraft. The division provides a comprehensive portfolio of products along with tailored hardware and software solutions for pneumatic, electric, and electronic safety testing systems. More than 20 engineers are engaged year-round to refine measurement precision and develop industry-leading aviation test equipment.

### **About Pilot John International (Pji)** <https://www.pilotjohn.com>

Pilot John International delivers advanced, customer-centric solutions, ensuring efficient access to reputable brands through its modern, user-friendly website. Its OEM-certified service centre offers complete GSE maintenance, precision calibration and repairs, and mobile services. Pji also features flexible financing options, as well as rental and trade-in programmes, complemented by an extensive product selection to meet diverse customer requirements.
