

PRESS RELEASE
EMBARGOED UNTIL: Tuesday, October 14, 2025,
09:00 Montreal (EDT, UTC-4)

Avianor launches a new digital marketplace, featuring aircraft parts, project customization, and tailored support, all in one place.

The new marketplace, a first-of-its-kind in the aerospace industry, is a 3-in-1, where procurement and cabin modification technical teams can search interior parts using advanced filters, select and add their items to a project tool to request a quote, and connect with a specialized team at Avianor for personalized support. It is designed to optimize costs and turnaround times for airlines, lessors, and integrators worldwide.

Mirabel, October 14, 2025 – Avianor, an affiliate of DRAKKAR and an aviation industry leader with 30 years of aerospace experience in commercial and defence aircraft maintenance (MRO) and interior solutions, announces the launch of its new digital marketplace. It brings together services specifically designed to meet the needs and requirements of cabin modification projects for companies worldwide.

The user-friendly space offers a one-stop destination for all interior projects and has been designed to meet the needs of cabin modification technical teams integrating advanced digital functionalities that make it easier to find the right part or alternative solutions. With this new value proposition, Avianor extends and strengthens its support to a vast network of customers across the world.

“The Avianor marketplace is unique in our industry,” stated Pierre-Louis Patin, Vice president - Interior Solutions at Avianor. *“I wish I had access to such a tool back in the day when I was hands-on driving cabin modifications projects. This is a real game changer.”*

Visit avianor.com and discover Avianor’s marketplace, a unique array of parts, services and support. Key features include:

- **Categorization and filtered searches:** Each part is categorized according to several identification factors based on manufacturer, model (e.g. A320 family, A330/340, B737, B767...), part number, usage, and other differentiators. These filters simplify and accelerate the search process making it easier to quickly find the right part.
- **Project creation and quote requests:** Clients can also create “Projects”, adding items using a dedicated tool to build their interior projects (also known as BOM – bill of materials or parts list). This feature also allows them to request a consolidated quote for all items in a project and collaborate with team members.
- **Tailored support:** If in-demand parts are unavailable, Avianor will assist in parts sourcing, propose alternative parts, including modification, maintenance or even new design along with the relevant certification (FAA, EASA, TCCA etc.). True to its collaborative approach and

unique expertise in the industry, Avianor is providing the support of a dedicated team for special requests and assistance so specific demands, and unique needs can be met.

- 30 -

About Avianor

Avianor, an affiliate of DRAKKAR, has been a leader in MRO and interior solutions of commercial and defence aircraft for 30 years. Located at YMX International Aerocity of Mirabel, it has 360 permanent and temporary employees, in addition to 300,000 square feet of hangars, manufacturing and repair shops, warehouses and offices. Its A220 Center of Excellence, inaugurated in November 2024, is a cutting-edge facility serving airline companies worldwide. Avianor maintains its growth and position of choice within the local, national and international aerospace industry.
